All Court Fabric Now Offers More Printed Athletic Screen Choices

Chicago, IL November, 2020 --- All Court Fabrics customers now have more materials, colors, and print options when purchasing printed fence screens. Along with its industry leading 5 year 'No Fade' print warranty, All Court Fabrics can now offer a full range of options to its custom windscreen manufacturing customer segments such as athletic stadiums, tennis court facilities, baseball fields, and large scale events.

"We feel we now can pretty much fulfill any type of printed athletic screening project," says Teri Wysocki, All Court Fabrics's Sales Manager. "Given our range of material and color choices, and the print options we now offer, we really can offer the best value to our customers."

Materials from All Court Fabrics now include a range of temporary and permanent grades that can be shipped in bulk on the same day of purchase. From the popular seller Polypro Tennis, a durable 100% Polypropylene that pairs well with All Court Fabrics's direct printing option, to Permascreen Plus, a weather tough vinyl polyester that can stand up to years of outdoor wear and tear at tennis courts and athletic fields, All Court Fabrics offers a full range of fence screen materials to match customers requirements.

Wysocki says, "All of our materials come warrantied and customers can view spec sheets to see the opacity, tensile strength, and other features. A lot of tennis screens out there on the market are imported, and of dubious quality. Life's too short for bad tennis winds screen let's face it."

All Court Fabrics athletic screen ships finished for quick installation and increased durability, with four ply reinforced hems and brass grommets at 18 inch intervals. For maximum privacy and wind protection All Court Fabrics offers Polypro 95, its most durable screening.

Considering colors is one aspect of athletic screen purchasing often overlooked by potential buyers, as they tend to consider the standard black and green most often installed on fences. But Wysocki says that with over 10 vibrant color choices, customers are wise to consider using something brighter that will stand out.

"Especially with printed tennis and athletic screening, even basic logos and lettering really stand out on top of windscreen colors." She adds that all All Court Fabrics material colors are UV resistant so the vibrancy will last for years to come. "Tennis courts are some of the hardest wear and tear on windscreen, making sure you get quality and material is important to make sure it lasts as long as you need it to."

Finally, All Court Fabrics's 3 print options make it stand out in a competitive athletic screen industry, providing best value to customers with a wide range of windscreen requirements. Full color digital printing yields high res quality tennis screen. Direct printing from All Court Fabrics is an affordable, durable solution that yields excellent logos and lettering. Stitch-on panels allow for an economical solution for branding events and other temporary applications.

"Customers I think hesitate to consider athletic screen printing because of the cost, but with the full range of options available from All Court Fabrics custom printing can be a great opportunity to market your team, your sponsors, and your fans while not over stretching the budget."
